CONSTRUCTION 6-MONTH LOOK AHEAD

**Route 28**
- Construction of bridge piers and foundations for Braddock Road/Walney Road bridge over Route 28 and other bridges at interchange
- Retaining wall construction throughout interchange
- Widening of Route 28 North and South from Braddock Road to Westfields Boulevard
- Deck work on new bridges over I-66
- Opening of temporary ramp from I-66 East to Route 28 North

**Route 29**
- Long-term closure of ramp from Route 29 South to I-66 West (implemented October 28, 2019) – closure will last approximately 18 months
- Partial demolition of I-66 bridge over Route 29 starting early December over 2 weekends
- Long-term turn lane and ramp closure of Route 29 North to I-66 East beginning early 2020 – closure will last approximately 4 months
- I-66 traffic will remain the same
- Construction of bridge abutments and piers
- Construction of new shared-use path along Route 29 South, underneath bridge (existing shared-use path along Route 29 will remain open during construction)

**Poplar Tree Road**
- Abutments and retaining wall construction completed
- Beam lifts beginning in early December (night work)
- New roadway under construction east of Route 28
- Deck work once bridge beams are in place (day work)

**Mainline I-66**
- Continue small charge blasting along eastbound and westbound I-66, from Route 29 to east of Route 28 Interchange and inside the Route 29 Centreville Interchange
- Excavation and retaining wall construction

TRANSFORM 66
In early 2020, the two left turn lanes from Route 28 North to Braddock Road will close. To access Braddock Road from Route 28 North:

- Drivers will continue on Route 28 North for approximately one mile to the traffic signal at the E.C. Lawrence Park athletic fields.
- The left lane on Route 28 North will become two U-turn only lanes.
- At the traffic signal, drivers will make a U-turn onto Route 28 South.
- Continue on Route 28 South for approximately one mile to turn right onto Braddock Road.

Drivers will continue to access Route 28 South from Braddock Road.

The E.C. Lawrence Park entrance off Route 28 will be permanently closed prior to the implementation of this detour.

The new E.C. Lawrence Park access road is open off of Stonecroft Boulevard.

This detour is necessary to complete bridgework for the new overpass that will connect Braddock Road and Walney Road over Route 28.

This detour will remain in place through November 2020.
Starting in early 2020, the left turn lane from Route 29 North to I-66 East will close. To access I-66 East from Route 29 North drivers should:

- Stay to the left and continue north on Route 29 to the intersection of Route 29 and Trinity Parkway/Machen Road.
- From the left-most turn lane only, make a U-turn onto Route 29 South.
- Continue on Route 29 South to the ramp for I-66 East.

As an alternate route, drivers can also continue north on Route 29 to Route 28 North, then stay to the right and follow signs to I-66 East.

Detour will remain in place for approximately four months.

Closure of the left turn lane from Route 29 North to I-66 East and the spur ramp to I-66 East is necessary for construction of the new I-66 bridges over Route 29.
Access to the athletic fields at E.C. Lawrence Park is changing to accommodate the removal of traffic signals on Route 28 between Westfields Boulevard and I-66.

A new park access road from Stonecroft Boulevard has been built to the north of the athletic fields.

To reach the athletic fields and other park facilities from Route 28, drivers should take the exit for Westfields Boulevard West, turn left at the traffic signal to Stonecroft Boulevard, then turn right at the new park entrance.

More than 100 parking spaces have been added near the baseball and softball fields.

Park access will be enhanced when Stonecroft Boulevard is connected with Poplar Tree Road via a new bridge over Route 28 that is scheduled to open in November 2020.

The new address for the E.C. Lawrence Park athletic fields is 5000 Stonecroft Boulevard Chantilly, VA 20151.

The existing park entrance off of Route 28 will temporarily remain open for inbound traffic as an ENTRANCE ONLY. Traffic will not be permitted to exit the park onto Route 28. This entrance will close permanently in December 2019.
I-66 NOISE BARRIER REMOVAL AND REPLACEMENT FOR CONSTRUCTION

Typical Work Sequence for Noise Barrier Replacement

1. Install temporary chain link fencing to establish work area
2. Excavate new barrier platform
3. Install temporary support structure
4. Build retaining wall and noise barrier panels
5. Remove temporary chain link fencing and restore area
6. Demolish existing noise barrier and clear trees
7. Drill and install foundation support
8. Install drainage
9. New noise barrier complete

Where it is necessary to remove existing noise barrier for construction, once noise barrier is removed work will be continuous. New replacement noise barrier will be completed within eight months.

If your community has a noise barrier today, you will have one in the future. Replacement walls will be at the same height or higher than existing walls.

TRANSFORM 66
From 9 p.m. on Friday, December 6, 2019 through 5 a.m. on Monday, December 9, 2019, Route 29 North will be closed at I-66.
  • All northbound Route 29 traffic will be diverted to the southbound side of Route 29.
  • On southbound Route 29, one travel lane will be devoted to northbound traffic and one travel lane to southbound traffic.
  • All ramps to/from I-66 will be right turn only.
    - Route 29 South, no left to I-66 West
    - I-66 East, no left to Route 29 South
    - I-66 West, no left to Route 29 North
    - Route 29 North, no left to I-66 East

From 9 p.m. on Friday, December 13, 2019 through 5 a.m. on Monday, December 16, 2019, Route 29 South will be closed at I-66.
  • All southbound Route 29 traffic will be diverted to the northbound side of Route 29.
  • On northbound Route 29, one travel lane will be devoted to southbound traffic and one travel lane to northbound traffic.
  • All on/off ramps to/from I-66 will be right turn only.
    - I-66 West, no left to Route 29 North
    - I-66 East, no left to Route 29 South
    - Route 29 South, no left to I-66 West
    - Route 29 North, no left to I-66 East
