Access to the ballfields at E.C. Lawrence Park is being shifted as part of an effort to improve traffic flow and safety on Route 28 by removing the traffic signals between Westfields Boulevard north of I-66 and Lee Highway (Route 29) to the south. A new access road via an extension of Stonecroft Boulevard, north of the ballfields, has been built. Expanded parking facilities at the ballfields have also been constructed. Additionally, by November 2020, Stonecroft Boulevard will also connect with Poplar Tree Road via a new bridge being built over Route 28.

Starting on or about Wednesday, November 13, 2019, drivers using the new access road can access the park:

- **From Route 28 North:** continue north on Route 28 to the exit for Westfields Boulevard West, turn left at the traffic signal to Stonecroft Boulevard, and, turn right on to the new Park Access Road.

- **From Route 28 South:** take the exit for Westfields Boulevard West, turn left at the traffic signal to Stonecroft Boulevard, and, turn right on to the new Park Access Road.

- The existing park entrance off of Route 28 will temporarily remain open for traffic as an ENTRANCE ONLY. Traffic will not be permitted to exit on to Route 28 from the park ballfields.

- The park entrance off of Route 28 will close permanently later this year.
