Work began on the new University Boulevard Park and Ride lot in June 2018. Clearing, grubbing, grading, and excavation of half of the storm water retention basins has occurred to date. Over the next several months work will continue on the retention basins and trenching will occur for drainage pipe placement underground. The lot is scheduled to open with 960 spaces in summer 2019 to support carpooling and bus service during Transform 66 construction. The lot will offer 2,046 parking spaces with direct access from University Boulevard to the I-66 Express Lanes when they open in December 2022. There will be room for additional expansion. To keep up to date on project progress and for more project information, sign up for updates at transform66.org.

**OVERVIEW**

**PROGRESS IN 2018**
- Perimeter controls in place
- Clearing and grubbing complete
- Partial excavation of two retention basins
- Earthwork and removal of top soil

**WHAT TO EXPECT WINTER 2019**
- Earthwork and removal of top soil
- Excavation of remaining retention basins
- Berm work in excavation basins
- Storm water drain trenching and blasting for underground pipe placement

**WHERE**
University Boulevard – Gainesville

**WHEN**
Opens Summer 2019
