

Traffic Changes at I-66 and Route 123 Interchange Starting On or About April 19, 2019

The Route 123 (Chain Bridge Road) interchange is being reconstructed to improve traffic flow and safety, and will provide direct access to and from the future I-66 Express Lanes. These improvements require a series of traffic pattern changes during construction. Starting on or about April 19, 2019, drivers should expect the following traffic changes:

- The loop ramp from northbound Route 123 to I-66 West will close. Drivers will access I-66 West by turning left at a temporary traffic light using two new left turn-only lanes and new roadway to join the existing ramp from southbound Route 123 to I-66 West.
- Two travel lanes will continue through the interchange in each direction.
- Drivers traveling south on Route 123 should be alert for the new traffic signal.

Drivers should expect additional changes as work progresses at the interchange. Use caution and pay attention to lane markings and roadway signs.

Traffic pattern changes at I-66/Route 123 interchange are coming in spring 2019. Drivers traveling north on Route 123 will access I-66 West by turning left at a traffic light and joining the ramp from southbound Route 123 to I-66 West.
