Partial Demolition of Route 28 South Bridge to Begin on or about March 5, 2021

The Route 28 Interchange is being rebuilt as part of the Transform 66 Outside the Beltway Project. Partial demolition of the old Route 28 South Bridge will begin on or about March 5, 2021. Demolition of the bridge is anticipated to take approximately five to six nights of work, depending on weather and other factors. Find updates on progress and upcoming work at outside.transform66.org/route28.

- Demolition of the bridge deck is planned Friday, March 5, from 10 p.m. to 8 a.m. The deck demolition will resume around 10 p.m. on Saturday, March 6, and continue until complete around midday on Sunday, March 7. Demolition of the bridge deck involves breaking up the concrete deck using jackhammers, saw cutters, and hoe rams.
- Steel bridge beams will be removed during the overnight hours Sunday, March 7, and Monday, March 8.
- Demolition work will occur over I-66 travel lanes. This work can only be completed during overnight hours when I-66 can be closed for the safety of workers and the traveling public. There will be full closures of I-66 during the overnight hours, which will benefit the surrounding community by reducing the number of nights of demolition work from approximately 10-12 to approximately five to six.
- All demolition work is weather dependent and will be rescheduled if inclement conditions occur.

Partial Demolition of Western Portion of Route 28 South Bridge

Partial Demolition of Route 28 South Bridge (cont.)

- Following the demolition of the bridge spans and removal of the steel bridge beams, the bridge piers along I-66 East and West will be demolished.

- Demolition of the piers can only be completed during overnight hours (typically between 10 p.m. and 4 a.m.) when multiple lanes of I-66 can be closed for the safety of workers and the traveling public, and is anticipated to take 1-2 nights of work.

- The remainder of the current Route 28 South Bridge will be demolished at a later date.

**Demolition of Bridge Piers**

Minimizing Impacts to Neighbors:

*Some demolition activities will generate unavoidable noise and other impacts. When those activities occur, measures will be taken to minimize impacts as much as feasible.*

- Concrete will be hauled away to be processed off-site
- Work area lighting will be directed toward roadway/away from residences
- Dust control measures will be in place
- Construction vibration and noise will be monitored

Updates on progress and upcoming activities will be posted to outside.transform66.org/route28 as demolition proceeds. Visit the web page to sign up for project updates and e-mail notifications about traffic pattern changes and lane closures.
