The I-66/Route 28 interchange is being reconstructed to improve traffic flow and safety, and provide direct access to and from the future I-66 Express Lanes. Improvements include removal of traffic lights from this portion of Route 28 by the end of 2020. Traffic patterns will change along the Route 28 corridor to accommodate construction.

Starting on or about May 1, 2019, through late fall 2020, drivers should expect:

- Temporary closure of Walney Road between Route 28 and Cabells Mill Road
- Temporary elimination of right turn and traffic signal from Route 28 North to Walney Road
  - Drivers can access Walney Road from northbound Route 28 by continuing North to the Westfields Boulevard interchange, staying to the right to go East on Westfields Boulevard, then turning right on Walney Road
- Permanent elimination of right turn from Walney Road to Route 28 North
  - Drivers can access Route 28 by taking Walney road North, then turning left on Westfields Boulevard to the Route 28 interchange
- Drivers accessing Braddock Road from I-66 and Route 28 North can continue to use the left-turn lanes and the existing traffic signal

Traffic patterns will continue to change over the next few years as construction progresses. Be aware of changes in lane markings and signage in the interchange indicating the flow of traffic.
